

# Yellow Audio Recording

**Purpose of recording:** During this semester you may have a chance to work with a tutor on one of your challenging areas. The tutor will use this yellow recording to prepare tutoring materials for you.

For this assignment, you will record the AT practice materials for the sound-level targets from your Areas for Special Work.

## Recording guidelines:

- Please find a **quiet place** to make your recording using Audacity and put your mouth close to the microphone for best quality. Be sure to watch the wave form and adjust the recording level to get the wave peaks between +5 and -5.
- Do a **sample recording to check** that you are making a loud and clear recording.
- **Record the title of each item.** For example: "Area Target 8: yogh and d-yogh." Please record your target areas in the same order as they appear in your **Areas for Special Work**.
- **Save the file** as an MP3, titled Yellow 2-XXX (your initials).
- **Upload** the file to your personal drop box using your ticket.

## What to record:

Record: AT # \_\_\_\_ AT # \_\_\_\_

Record each paragraph or dialog **once**. If there is a word list, record each word **twice**.

*Thank you!*
